Sampling of Benthic Macroinvertebrates	Date <u>8/24/92</u>	DCN Number <u>92.01 Kam</u>
--	------------------------	--------------------------------

Expires 11/24/92 Procedure Revision Required ☒ Yes ☐ No
 Scope Limitation: OU 3

Item Number	Page	Step or Paragraph	Changes (Use DCN CONTINUATION SHEET for additional space)
1	13	6.3.2	Delete "distilled" in the fifth bullet.
2	13	6.3.3	Replace the first sentence with the following: Transfer the sample from the bucket or tub into the sample container using a squirt bottle and distilled, tap, or local water, according to the project FSP, taking precautions so foreign material is not introduced into the sample.

Justification (Reason for change - Provide numbers to reference corresponding items above.)

- Since the benthic macroinvertebrates live in the ambient water, local water should be acceptable for concentrating the sample in the benthic wash bucket, and transferring the sample to the sample jar. For some specific projects, health and safety concerns or other issues may call for the use of tap or distilled water.
- Same as 1.
